	Usage	To prevent premature wear, felt or synthetic pads should be placed under the legs of furniture and chairs. For occasional loads of 100 kg/cm ² , a weight-distribution system should be used. If using a roller chair, make sure it is fitted with soft-tread casters, type W. (EN 12529 : 1998,5.4.4.2.), which usually have a 2 colour design.
	Care	Clean the flooring with the grain, using a broom. A vacuum cleaner can also be used (brush, without rollers).
	Anti-dust-mite	
	Water Protect product	Application of a thin layer of paraffin on the edges will prevent water ingress between the planks.
	Products suitable for a humid environment	Product compatible with humid rooms, when used with a CLICSEAL waterproofing product on the plank tongues and COLORSEALANT sealant around the room perimeter (between the wall and the laminate flooring) to prevent water ingress under the flooring. Do not allow water to pool on the product.
	The company is a member of the Association of European Producers of Laminate Flooring	Only companies with a commitment to high standards of quality with corresponding production processes are accepted as members of the Association.
	Product compatible with underfloor heating	The flooring can be laid on surfaces with underfloor heating (including certified radiant electric floor heating). This is possible only if the thermal resistance of the entire system (underlay + laminate flooring) < 0,15 m ² K/W.
	The company is PEFC-certified (Program for the Endorsement of Forest Certification schemes)	PEFC is a Forest certification system which contributes to the sustainable management of forests. The PEFC logo shows consumers that they are buying a product for which the wood comes from sustainably managed forests. It is tangible proof of the environmental awareness and responsibility of the company.
