

THE SUSTAINABLE CHOICE

UPM ProFi DECKINGS

Recycling is not an option: it is a must,
and together we can be part of the
circular economy.

Since 2007, UPM ProFi has been a
pioneer in giving a high quality and long
lasting second life to materials that would
otherwise be landfilled or incinerated.

United Nations recognises UPM
as one of 34 Global Compact LEAD
companies demonstrating world-class
commitment to corporate sustainability.

MEMBER OF
**Dow Jones
Sustainability Indices**
In Collaboration with RobecoSAM 

UPM recognised as the industry's most
responsible company in the global
Dow Jones Sustainability Index

**ISO 50001, ISO 14001,
ISO 9001**

Independently audited
energy management, environmental
& quality systems

1m² of UPM ProFi Deck board contains **10kg of recycled label waste** and **binds 18kg of CO₂**

Since 2007 more than **42 000 t/1 750 lorries** of label waste recycled

Non toxic: compliant with EN71-3 safety standard for materials used in toys

All UPM ProFi products are PVC free

Buildings with UPM ProFi deckings are LEED point eligible

Certified recycled materials management

Giving a valuable second life to waste materials reduces land fill and ocean pollution. It also means less CO₂ emission and less demand on scarce natural resources. It has been estimated by the Ellen MacArthur Foundation, that if our habits do not change, there will be more plastic than fish in the oceans by 2050.

Since 2007, UPM ProFi has been a pioneer in giving a high quality and long lasting second life to materials that would otherwise be landfilled or incinerated. UPM ProFi deckings are produced according to independently audited environmental, quality and energy management systems. UPM is committed to increasing the total recycled content of its decking range over the years, whilst maintaining strict performance and quality limits.

UPM ProFi decking material can be recycled, and UPM is looking into ways as to how a collection system could be created. In the meantime, being non-toxic and PVC free, off-cuts from UPM ProFi can be disposed of in normal household waste for energy production.

With material efficient hollow profiles, in addition to solid profiles, and local production in Germany and Finland, UPM ProFi has Europe's most sustainable offering in composite decking.

Recycled Materials

UPM ProFi Deck 150
(hollow)

UPM ProFi Piazza One & Pro (solid)

UPM ProFi Terra 127
(hollow)
